

## Dear Parent/Guardian,

We would like to start a Code Club for your children and we are looking for enthusiastic, tech-savvy parents to help us run it!

## What is Code Club?

Code Club is a worldwide network of after-school coding clubs for 8 - 12 year olds.

There are over 10,000 Code Clubs running around the world and official Code Club communities in 10 countries.

## How does it work?

Code Clubs run for one hour per week outside of curriculum hours.

Code Club provides step-by-step activity sheets for the children to follow so they can create games, animations and websites, learning the key concepts of programming at the same time.

## What do the children learn?

Code Club has resources to teach children Scratch, HTML/CSS, and Python.

Learning to code is more than a vocational skill - it changes the way children analyze and solve problems, encourages creative thinking and collaboration.

## How can you help?

We need keen volunteers to assist in running the club for one hour a week during the session.

You don't need to be an expert - you just need to be enthusiastic, know one end of a mouse from the other and be willing to learn alongside the children.

Find out more at [www.codeclub.ca](http://www.codeclub.ca) and help to inspire the next generation!

Yours,

.....
